

WOWO stands for Write On Wipe Off. It's the world's first workable desktop surface that can be fully cleaned and won't leave a trace with your whiteboard marker. Not just available on tables however, walls, restaurants, offices, your home and even in the bush you can use WOWO.

The uses and possibilities with WOWO are endless.

We develop and manufacture our own products. Technology will be integrated into our products from 2016, starting with a WOWO APP.

HOW IT WORKS

Once you have drawn something on a WOWO board, simply use an *Approved WOWO cleaner and wipe off your board. It'll look good as new! Do not use permanent markers. Microfiber clothes are recommended for cleaning the surface of a WOWO board. Refer to our USER GUIDE which is available as a download, if you want to maintain your WOWO properly.

For more information don't hesitate and contact us on (+27) 012 653 5668.

WOWO is currently patent pending in status.
